**Upright
 REJUVENATION
 Program®**

Sports Imports is committed to redefining excellence. That's why we developed the Volleyball **Upright Rejuvenation Program®** for our customers.

We understand normal, everyday use can cause even the most high-quality product to look worn. This unique program helps your uprights look and perform like new again. Let Sports Imports rejuvenate your older equipment with no hassle and minimal cost.

Just Like **NEW**

SPORTS IMPORTS
your source for Senoh

BEFORE AND AFTER

BEFORE

- Missing parts
- Scratched paint
- Wear and tear

AFTER

- New parts
- Fresh paint
- Great new look

THE PROGRAM

Our rejuvenation process takes an estimated six to eight weeks and can be done at any time during the year. Sports Imports currently offers this program for the Senoh DE11 and DE60 Uprights.

Not sure which upright you have?

Look for these features:

- Painted red, except for our very first uprights sold in the late 1970s, which are battleship gray. However, keep in mind that your organization may have painted them another color at some point in their history.
- Three inches in diameter, made of steel and use a pin-stop height adjustment mechanism.
- 11 pre-drilled holes in the upper telescopic section.

For now, this program does not apply to the DE10 and AL7 uprights.

Guarantee and Shipping

The rejuvenated uprights will carry the same lifetime warranty that we provide on new uprights. We will arrange for the shipping of the uprights to and from your facility. For an additional cost, Sports Imports can expedite the 6–8 week turnaround time with an express service. For more information call **800-556-3198**.

“We are the only company that can offer this kind of program because of the simple design and top quality materials used in Senoh uprights. Rejuvenation will maximize the high-quality appearance of previously-purchased uprights.”

- Brad Underwood, president

THE PROCESS

- Strip the old paint and repaint the upright
- Give the upper section a zinc plating bath to make it shine like new
- Repair bent hooks and replace the following removable parts:
 - Rubber end plug on the bottom of the upright
 - Tightener bolts
 - Stop pin and chain
 - Pulley wheel
